

25th September 2024

Dear parent/carer,

We are excited to invite your child to join our STEM Club, in collaboration with Sizewell C.

As part of this program, students will participate in a full-day workshop with an external specialist each term. Every term, we will explore a different scientific field currently in practice at Sizewell C, including areas such as Pneumatic and Hydraulic Engineering, Crumble Coding, and Drone Coding.

Additionally, students will attend bi-weekly after-school sessions on Wednesdays for one hour to engage in follow-up activities.

Selected students will also have the opportunity to attend the Sizewell C Celebration, where they can showcase their creations and achievements from the program. During this event, they will participate in new hands-on activities, tour the Sizewell C facility, and hear from industry professionals.

This program offers a unique opportunity for students to see how science is being applied and adapted to meet the needs of our local community. Through practical experiments, students will develop essential skills that are highly sought after by future employers. These transferable skills - including problem-solving, leadership, teamwork, and communication - will not only benefit their academic journey but also enhance their future career prospects.

Please note that if your child chooses to participate in this exciting opportunity, their attendance will be required for the successful completion of the course.

We look forward to your child's participation in this incredible program!

Kind regards

C Sanchez-Ignacio

Miss C Sanchez-Ignacio
